Predicted noise levels, dB LAeq(t) compared against DAYTIME noise limits.

A noise level of above 70 indicates a **Major** magnitude of impact  
 A noise level between 65 and 70 indicates a **Moderate** magnitude of impact  
 A noise level between 45 and 65 indicates a **Minor** magnitude of impact  
 A noise level below 45 indicates a **Negligible** magnitude of impact

Construction noise and construction traffic noise shall constitute a significant effect where it is determined that a major or moderate magnitude of impact will occur for a duration exceeding:  
 1) 10 or more days or nights in any 15 consecutive days or nights;  
 2) a total number of days exceeding 40 in any 6 consecutive months
